OBJECTIVE

A frontend developer with an eye for detail and an open mind for learning, improving and excelling in my skillset building resposive and scalable web apps that delight end users.

EXPERIENCE

2022 - Till date

- **Front end developer (volunteer)**
  GlobamedTech
  - Building responsive and scalable user-interfaces appealing to end-users
  - Working with the UI/UX, and backend teams to mitigate communication gaps
  - Contributed to the optimisation of best coding practices and team productivity

June 2023 - Till date

- **Frontend developer (volunteer)**
  RCFFUTA
  Building responsive and scalable user-interfaces appealing to end-users

SKILLS

- HTML5
- CSS3
- Javascript
- React.js
- Tailwind CSS
- Problem solving
- Communication
- Critical thinking

ADDITIONAL SKILLS

- Git
- Github
- Figma

PROJECTS

- **Medwaka**
  - Worked with the UI/UX team to build beautiful interfaces appealing to users
  - Built resposive web pages looking good on all devices

- **Image search app**
  - A web app that displays images based on user's search
  - Integrated with unsplash API for data fetching
  - Includes functionalities like search, loading, error handling, light/dark mode
  - Using tools like React Query, context API for better optimisation

- **Color generator**
  - A color generator that displays several shades of any selected color
  - Allows user to quickly copy any color when clicked
  - Designed the responsive page appealing to users on both large and small screens.

- **Tasks app**

A web app that works with a backend server and performs CRUD operations.

- **Github users**
  A web app that fetches data from an API, displays the data on the screen, with proper error handling.

- **Movie app**
  A web app that displays movie information
    - Worked with TMDb API to fetch movie information
    - Implemented search functionality that enables users search for any movie
    - Designed the webpage responsive and easy to use on all devices
